

ABSTRACT

An ashtray that mounts on the exterior of a vehicle that avoids the undesirable conditions of internal ashtrays. The ashtray can mount on a vehicle window, in a vent, or under a vehicle exterior mirror. The ashtray can also be built-in to the vehicle at the time of manufacture. The window version of the ashtray can contain hook/loop material (VELCRO) to attach it to the vehicle window and magnets so that the ashtray can automatically attach to the vehicle metal when the window is lowered. The mirror mounted version can contain a polished face to act as part of the mirror.
